1. Which of these terms best describes the type of AI used in today's email spam filters, speech recognition, and other specific applications?

- ☐ Artificial General Intelligence (AGI)
- ☒ Artificial Narrow Intelligence (ANI)

正确

1 / 1  
分数

2. What do you call the commonly used AI technology for learning input (A) to output (B) mappings?

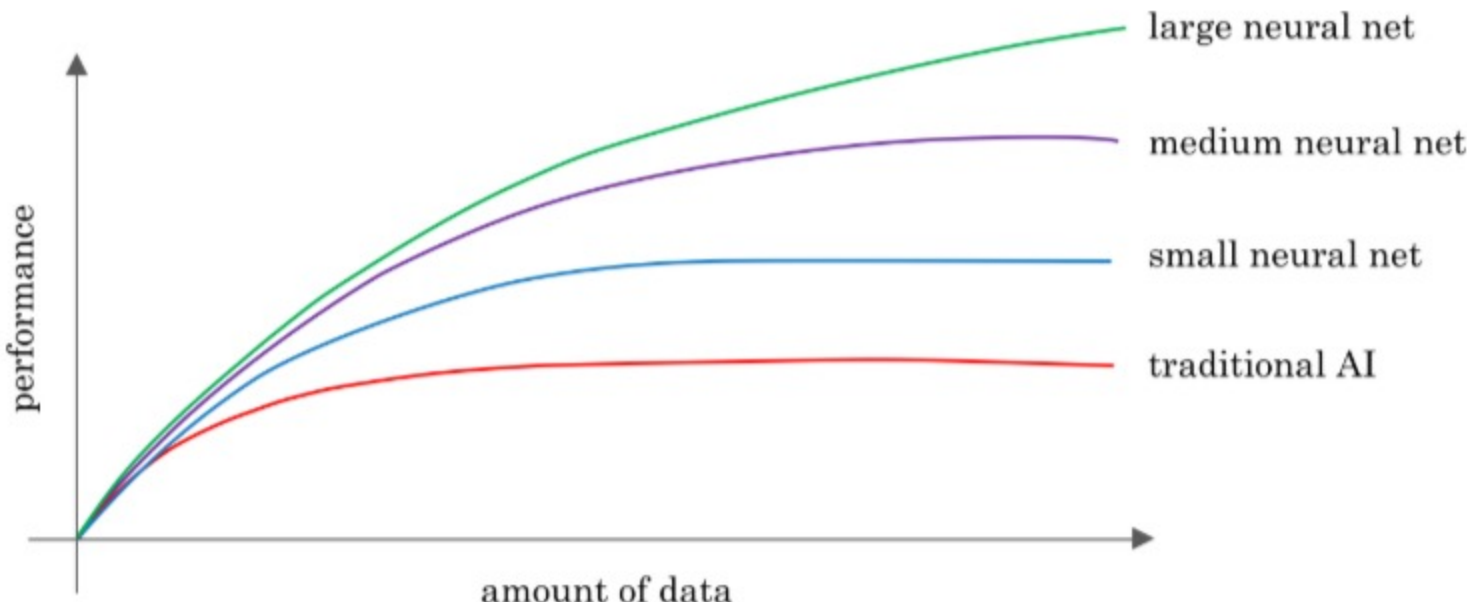

- ☐ Artificial General Intelligence
- ☐ Unsupervised learning
- ☐ Reinforcement learning
- ☒ Supervised learning

正确

3.

You want to use supervised learning to build a speech recognition system. The figure above suggests that in order for a neural network (deep learning) to achieve the best performance, you would ideally use: (Select all that apply)

- ☒ A large dataset (of audio files and the corresponding text transcript)

正确

- ☐ A small dataset (of audio files and the corresponding text transcript)

未选择的是正确的

- ☒ A large neural network

正确

- ☐ A small neural network

4. The only way to acquire data for a supervised learning algorithm is to manually label it. I.e., given the input A, to ask a human to provide B.

- ☐ True
- ☒ False

正确

1 / 1  
分数

5. Which of these statements regarding data acquisition do you agree with?

- ☐ It doesn't matter how data is acquired. The more data, the better.
- ☐ It doesn't help to give data to an AI team, because they can always produce whatever they need by themselves.
- ☐ Only structured data is valuable; AI cannot process unstructured data.
- ☒ Some types of data are more valuable than others; working with an AI team can help you figure out what data to acquire.

6. You run a company that manufactures scooters. Which of the following are examples of unstructured data? (Select all that apply.)

- ☒ Pictures of your scooters

正确

- ☒ Audio files of the engine sound of your scooters

正确

- ☐ The maximum speed of each of your scooters

未选择的是正确的

- ☐ The number of scooters sold per week over the past year

未选择的是正确的

7. Suppose you run a website that sells cat food. Which of these might be a good result from a Data Science project? (Select all that apply.)

- ☐ A large dataset of images labeled as "Cat" and "Not Cat"

未选择的是正确的

- ☐ A neural network that closely mimics how cats' brains work.

未选择的是正确的

- ☒ Insights into how to market cat food more effectively, depending on the breed of cat.

正确

- ☒ A slide deck presenting a plan on how to modify pricing in order to improve sales.

8. Based on the terminology defined in Video 4, which of the following statements do you agree with? (Select all that apply.)

- ☐ The terms "Machine learning" and "data science" are used almost interchangeably.

未选择的是正确的

- ☒ The terms "Deep learning" and "neural network" are used almost interchangeably.

正确

- ☒ Deep learning is a type of machine learning. (I.e., all deep learning algorithms are machine learning algorithms.)

正确

- ☐ AI is a type of deep learning. (I.e., all AI algorithms are deep learning algorithms.)

未选择的是正确的

9. What of these do AI companies do well?

- ☐ Strategic data acquisition
- ☐ Invest in unified data warehouses
- ☐ Spot automation opportunities
- ☒ All of the above

正确

10. Say you want to input a picture of a person's face (A), and output whether or not they are smiling (B). Because this is a task that most humans can do in less than 1 second, supervised learning can probably learn this A-to-B mapping.

- ☒ True

正确

- ☐ False
